APPROVED FIELD EVALUATION BODIES FOR 3rd PARTY EVALUATION, CERTIFICATION, AND TESTING OF ELECTRICAL EQUIPMENT

OSHA provides approval of Nationally Recognized Testing Laboratories (NRTLs) qualified to evaluate safety standards of equipment used in a workplace. The most widely known NRTL is UL, and the full list of NRTLs is at https://www.osha.gov/dts/otpca/nrtl/nrtllist.html. Internal wiring of equipment that is listed and labeled by a NRTL need not be inspected at time of installation.

Equipment that is not listed and labeled requires 3rd party certification. Some NRTL’s also provide this service for equipment within the scope of their expertise. An example is the UL Field Evaluation Program, and there are also independent companies that can perform these certifications; see list on next page.

Please note, the CE mark, which may look like the following: ☑️ is NOT a product certification marking. It is a self-certification as to suitability of trade within European (or other) borders, and has no meaning in the U.S. In addition to listing, labeling, or field evaluation, most machine tools also require special inspections for anchoring. Please see informational handout GA30 “Special Inspection Agency Recognition List.”

"I:\BLDG\FINAL\FORMS\Informational\GE02 Field Evaluation Bodies for Electrical Equipment_09-2019"
3rd Party Field Evaluation Bodies must follow the procedures in NFPA 790 and NFPA 791 and complete an application to the City of Santa Clara in accordance with Annex B of NFPA 790. This policy is consistent with the ICC Tri-Chapter Uniform Code Committee, which is intended to enhance regional consistency in application and enforcement of the building code.

In accordance with International Accreditation Service (IAS) policy and NFPA 791, the FEB should NOT apply markings to the inspected equipment until their report has been approved by the City of Santa Clara. When the initial report notes items requiring further corrections, the FEB shall confirm such corrections have been made and they meet compliance with all the regulations. The final report shall be returned to the City and prior to arranging for building department inspection.

Electrical Testing Companies

In addition to the above FEBs, many electrical installations require on-site testing, such as IR scanning or Ground-Fault performance testing. Such tests can be performed by any company that is accredited by NETA, the International Electrical Testing Association. Accreditation of other testing companies can be verified by contacting NETA, or by a copy of the NETA Certificate from the company, or by requesting a current NETA technician card for all Certified Level 2, 3, or 4 technicians. The following companies are NETA accredited:
