REQUEST FOR FINDING OF UNREASONABLE HARDSHIP

When public buildings, private buildings of public accommodation, commercial buildings or public housing facilities undergo **alterations, structural repairs, or additions**, an accessible path of travel must be provided, or the elements of an existing accessible path of travel that serve the area(s) of alteration or addition must be upgraded, in accordance with the 2019 California Building Code (CBC) Section 11B-202.4.

CBC Section 11B-202.4, **exception 8**, allows the cost of compliance with Section 11B-202.4 to be limited to 20% of the adjusted construction cost of the alterations, structural repairs or additions when the adjusted construction cost does not exceed the **current valuation threshold**. If the adjusted construction cost of alterations, structural repairs, or additions exceeds the valuation threshold, full compliance to 11B-202.4 shall be required unless the costs of the path of travel upgrades are found to be disproportionate to the adjusted construction cost, thus creating an unreasonable hardship. If an unreasonable hardship is determined, compliance to 11B-202.4 shall be by equivalent facilitation or compliance to the greatest extent possible but in no case less than 20% of the adjusted construction cost.

If alterations, structural repairs or additions to an existing building have been undertaken without providing an accessible path of travel upgrades to those altered areas, the total costs of those alterations on that path of travel during the preceding three year period will be considered in determining whether the cost of making the path of travel accessible is disproportionate.

In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access in the following order:

1. **An accessible entrance;**
2. **An accessible route to the area of alteration, structural repair, or addition** (see definition of accessible route Section 202 & 11B-206.2.1 for more information on accessible routes and site arrival points);
3. **At least one accessible restroom for each sex or one accessible unisex, single user or family restroom** serving the area of alteration, structural repair or addition;
4. **Accessible telephones, if provided**, serving the area of alteration, structural repair, or addition;
5. **Accessible drinking fountains** serving the area of alteration, structural repair, or addition; and
6. **When possible, additional accessible elements such as parking, storage, signs and alarms.**

Please answer the following questions on the subsequent page and complete the attached worksheet and include site and floor plans of the existing and proposed accessibility improvements along the accessible route to the area(s) of alteration, repair or addition. These documents shall be submitted to the Building Division prior to completing your building plan review process.
