Re: **Coordination of 2021 Work in City Streets**  
**City of Santa Clara Pavement Preservation Ordinance**

To Whom It May Concern:

On February 19, 2019, the City Council of the City of Santa Clara adopted Ordinance No. 1998 that places a restriction on the excavation of recently treated pavements for a specific period of time following the pavement treatment. This restriction is 3 years for streets that have been resealed, and 5 years for streets that have been resurfaced, reconstructed, or constructed.

The City of Santa Clara Department of Public Works is responsible for administering the provisions of the Ordinance, planning and performing street pavement maintenance work, and administering the City's Encroachment Permit Program for persons seeking to make excavations in City streets.

At this time, the Department desires to coordinate the City's planned 2021 pavement maintenance work with work planned by potential excavators. Please visit the City's Pavement Preservation webpage at: <https://www.santaclaraca.gov/i-want-to/place-holder/pavement-preservation> for a tentative list and map of streets that the City plans to perform pavement maintenance work on in 2021.

If excavators plan to perform work on those streets contained on this tentative street maintenance list, they are encouraged to perform the work **prior to June 1, 2021**. Upon completion of the 2021 pavement maintenance work, the restrictions on excavations will be enforced.

Please note that the Department is enforcing restrictions on streets which have or are scheduled to receive pavement treatment in 2020. Please reference the webpage listed above for information on the restricted streets.

Excavators may also submit questions, comments, or concerns related to the tentative list of streets to Vincent Luchessi at [vluchessi@santaclaraca.gov](mailto:vluchessi@santaclaraca.gov). Please include the subject line "Pavement Preservation" in your email.

**Pavement Preservation Coordination Contact List:**

The Department desires to coordinate pavement maintenance work with potential excavators on an ongoing basis in order to avoid damaging recently treated streets. In order for your organization to be included in the coordination program, please identify a specific staff contact within your organization with whom the City can coordinate. Please e-mail the name and contact information to Vincent Luchessi at [vluchessi@santaclaraca.gov](mailto:vluchessi@santaclaraca.gov).
